- GENERAL NOTES**
- When a high volume of work vehicles are entering and leaving the work area at the posted speed limit and ADI, the ROAD WORK AHEAD sign should be placed upstream 500 ft.
 - This TCZ plan also applies to work performed in the median more than 2' but less than 15' from the edge of travelway.
 - When work is being performed on a multilane unidirectional roadway the signs normally maintained in the median (as shown) shall be omitted.
 - WORKERS signs to be removed or fully covered when no work is being performed.
 - SHOULDER WORK sign may be used as an alternate to the WORKER symbol sign.
 - When a side road intersects the highway within the TTC zone, additional TTC devices shall be placed in accordance with other applicable TTC measures.
 - For general TTC requirements and additional information, refer to Index No. 600.

- DURATION NOTES**
- Signs and channelizing devices may be omitted if all of the following conditions are met:
 - Work is completed in 60 minutes or less.
 - Vehicle in the work area is not engaged in painting, resurfacing, or other high speed activity.

GENERAL NOTES

- Work operations shall be confined to one traffic lane, leaving the adjacent lane open to traffic.
- On undivided highways the median sign as shown are to be omitted.
- When work is performed in the median lane on divided highways, the channelizing device plan is inverted and left lane closed and lane ends signs substituted for the right lane closed and lane end signs.
- The same applies to undivided highways with the following exceptions:
 - Signs and traffic control devices shall be placed along the centerline abutting the work area and across the trailing end of the work area.
 - When work on undivided highways occurs across the centerline so as to encroach on both median lanes, the inverted plan is applied to the approach of both roadways.
- Signs and traffic control devices are to be modified in accordance with INTERMITTENT WORK STOPPAGE details (Table 2 of 2) when no work is being performed and the highway is open to traffic.
- The two channelizing devices directly in front of the work area may be omitted provided vehicles in the work area have high-intensity rotating, flashing, oscillating, or strobe lights operating.
- When speed chollars having a width of 8 ft. or more are closed, channelizing devices shall be used to close the shoulder.
- Signs are to direct vehicular traffic to remain within the travel way. See Index No. 612 for shoulder taper formula.
- When a state road intersects the highway within the TTC zone, additional TTC devices shall be placed in accordance with other applicable TCZ indexes.
- The TCZ plan does not apply when work is being performed in the middle lanes of a six or more lane highway. See Index No. 614.
- For general TCZ requirements, and additional information, refer to Index No. 600.

OPTION 1: Advance Warning Vehicle may be operated in the lane behind the Shadow Vehicle and the Arrow Board. Approved Truck Mounted Attenuators are required on both the Advance Warning Vehicle and the Shadow Vehicle.

OPTION 2: Advance Warning Vehicle must be operated in the lane behind the Shadow Vehicle. Approved Truck Mounted Attenuators are required on both the Advance Warning Vehicle and the Shadow Vehicle.

- GENERAL NOTES**
- These illustrations are representative of general conditions.
 - The figures illustrate closing the right shoulder or right lanes for various lane configurations. When work is required on left side of roadway, the inverted plan is to be applied. The nature of this project is to allow passing on any one side of the work canopy.
 - Arrow boards shall not be obscured by equipment, supplies, signs, or the enclosure.
 - Vehicle mounted signs shall be mounted with the bottom of the sign above the top of the arrow board. Signs shall be placed near of truck mounted changeable message signs and be above the top of truck mounted work signs. Changeable message signs shall flash alternately to read "Left or Right Lane or Two Left or Two Right Lanes", "Closed Ahead", and the arrow symbol. Arrow boards shall not be used with truck mounted changeable message signs. Sign placement shall be covered in Turner from view when work is not in progress.
 - On freeway facilities, interchanges, toll roads, and expressways, a traffic control officer is required for all nighttime operations for work within the travel lane.
6. If the work vehicle speed exceeds the minimum legal speed limit on limited access facilities, the Engineer may delete requirements for shadow vehicle and attenuator. The work vehicle will be required to have an arrow board and sign message.
7. When work activities within 2' of the edge of travel way are required, for signs, LULU, Removal, the Engineer may delete requirements for signs and the advance warning vehicle provided oscillating, or strobe lights are operating.
8. Work, Shadow, and Advance Warning Vehicles shall have high-intensity, rotating, flashing, occidants, or strobe lights operating.
9. Functional two-way communication is required between all vehicles in the mobile operation canopy.
