

# City Of Brooksville

*Community Development Department  
William "Bill" Geiger, Director*

---

## **Notice Regarding any emergency work or construction repairs pertaining to Hurricane Irma**

To all Property Owners and Contractors:

The Building Department and the City Manager are allowing work to begin for emergency repairs prior to permitting. We would, however, appreciate an email or quick phone call to let us know of your intentions prior to the repair. If the work or repair is going to cover up any work that would require inspections, PLEASE take pictures for our files, but go ahead and do the work. We would ask that a permit be obtained at your earliest convenience. All permitting fees will apply.

Work that requires a permit may only be completed by State of Florida or Hernando County licensed contractors. If you have emergency work that needs to be addressed, please ensure that the contractor has appropriate credentials and licenses. Please report unlicensed contractor activity or work to the Building Division.

We are open and available for permitting, plan review and inspections. You may contact the City of Brooksville permitting office at 352-544-8301 if you have any questions.

Sincerely,

Mark D. Jones  
Building Official
